

MOBILIFT CX | Portable Lift

The **Mobilift CX** is a multipurpose, portable wheelchair Lift that provides access to school stages, out-door bleachers and elevated platforms. Over 1000 units are used in schools, colleges, churches, auditoriums and historic buildings to provide handicapped access. The lift is ideal where structural modifications are impractical, unattractive, too costly or prohibited for historic reasons.

Unlike other vertical platform lifts the **Mobilift CX** is manually powered making it easy to use and highly portable. The absence of batteries, hydraulic and electric components make the Lift extremely reliable and virtually maintenance free.

Typical lifting time: 20 seconds to maximum height of 1.52m

Maximum lifting height: 1.52m

Capacity: 275kg

Lift weight: 120 kg
