CIBES V80 BY VESTNER

Perfect for installation in the centre of a staircase or atrium, the Vestner V80 features a stunning 360-degree glass shaft that maximises natural light and creates a striking architectural feature.

The self-supporting aluminium structure is installed directly onto the finished floor, eliminating the need for a concrete shaft, deep pit, or separate machine room.

With a pit requirement of just 50mm, the V80 offers a flexible, space-efficient accessibility solution for both residential and commercial buildings.

SPACE - SAVING TECHNOLOGY

NO MACHINE ROOM

Minimise civil works and able to open up on last floor without damage to roof area

ALL GLASS SHAFT

Able to do 360 glass shaft for a panoramic ride

SCREW DRIVE SYSTEM

Your lift is always attached to our screw and cannot “fall down”.
Silent and energy efficient

SUPERIOR QUALITY

From our glass (laminated and tempered) to our shaft (aviation grade aluminum with premium custom powdercoat), every detail of our lift is carefully studied to offer the best quality.

TOUCH AND LIGHT

Our Cibes lifts come with full touchscreen to offer a modern design that can match any interior

CABIN DESIGN

Our lifts are glass cabin lifts that offer full walls on three sides with a light-curtain opening on the door side for unparalleled levels of safety

ANTI-STUCK SYSTEM

Battery back up, reset tag on door, phone and emergency openings – we have you covered even if the worst were to happen!

NO PIT

Installing our lift is simple – it requires minimal civil works and comes with its own shaft
